

MILLIONS OF NEW STEM CELLS

STEM CELL RELEASE FACTOR

NEW SCIENTIFIC ANTI-AGING BREAKTHROUGH

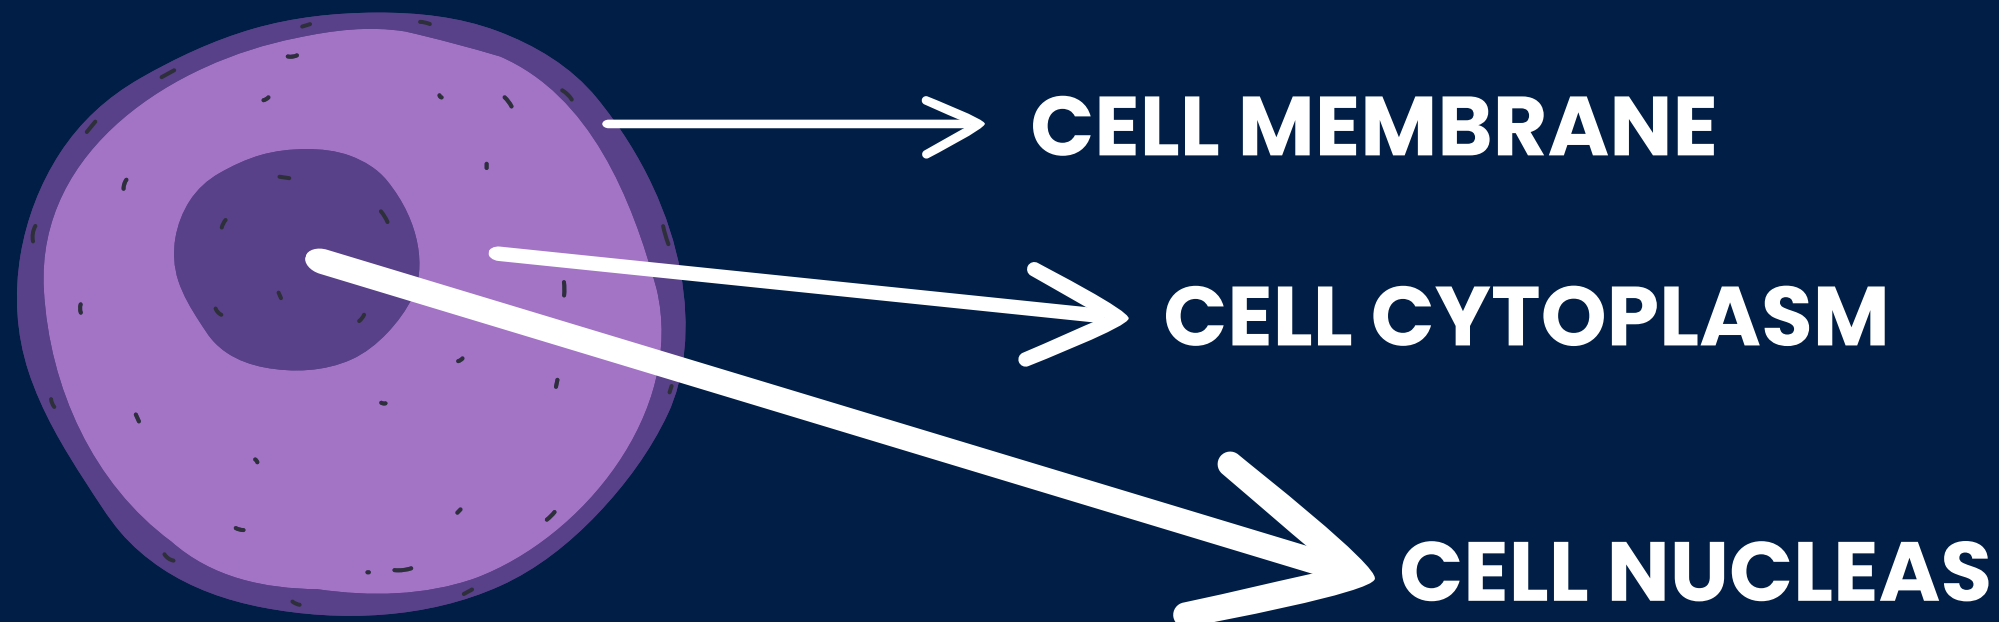

**OUR BODIES ARE
MADE UP OF
ABOUT A
HUNDRED MILLION
MILLION
(100,000,000,000,
000) TINY CELLS.**

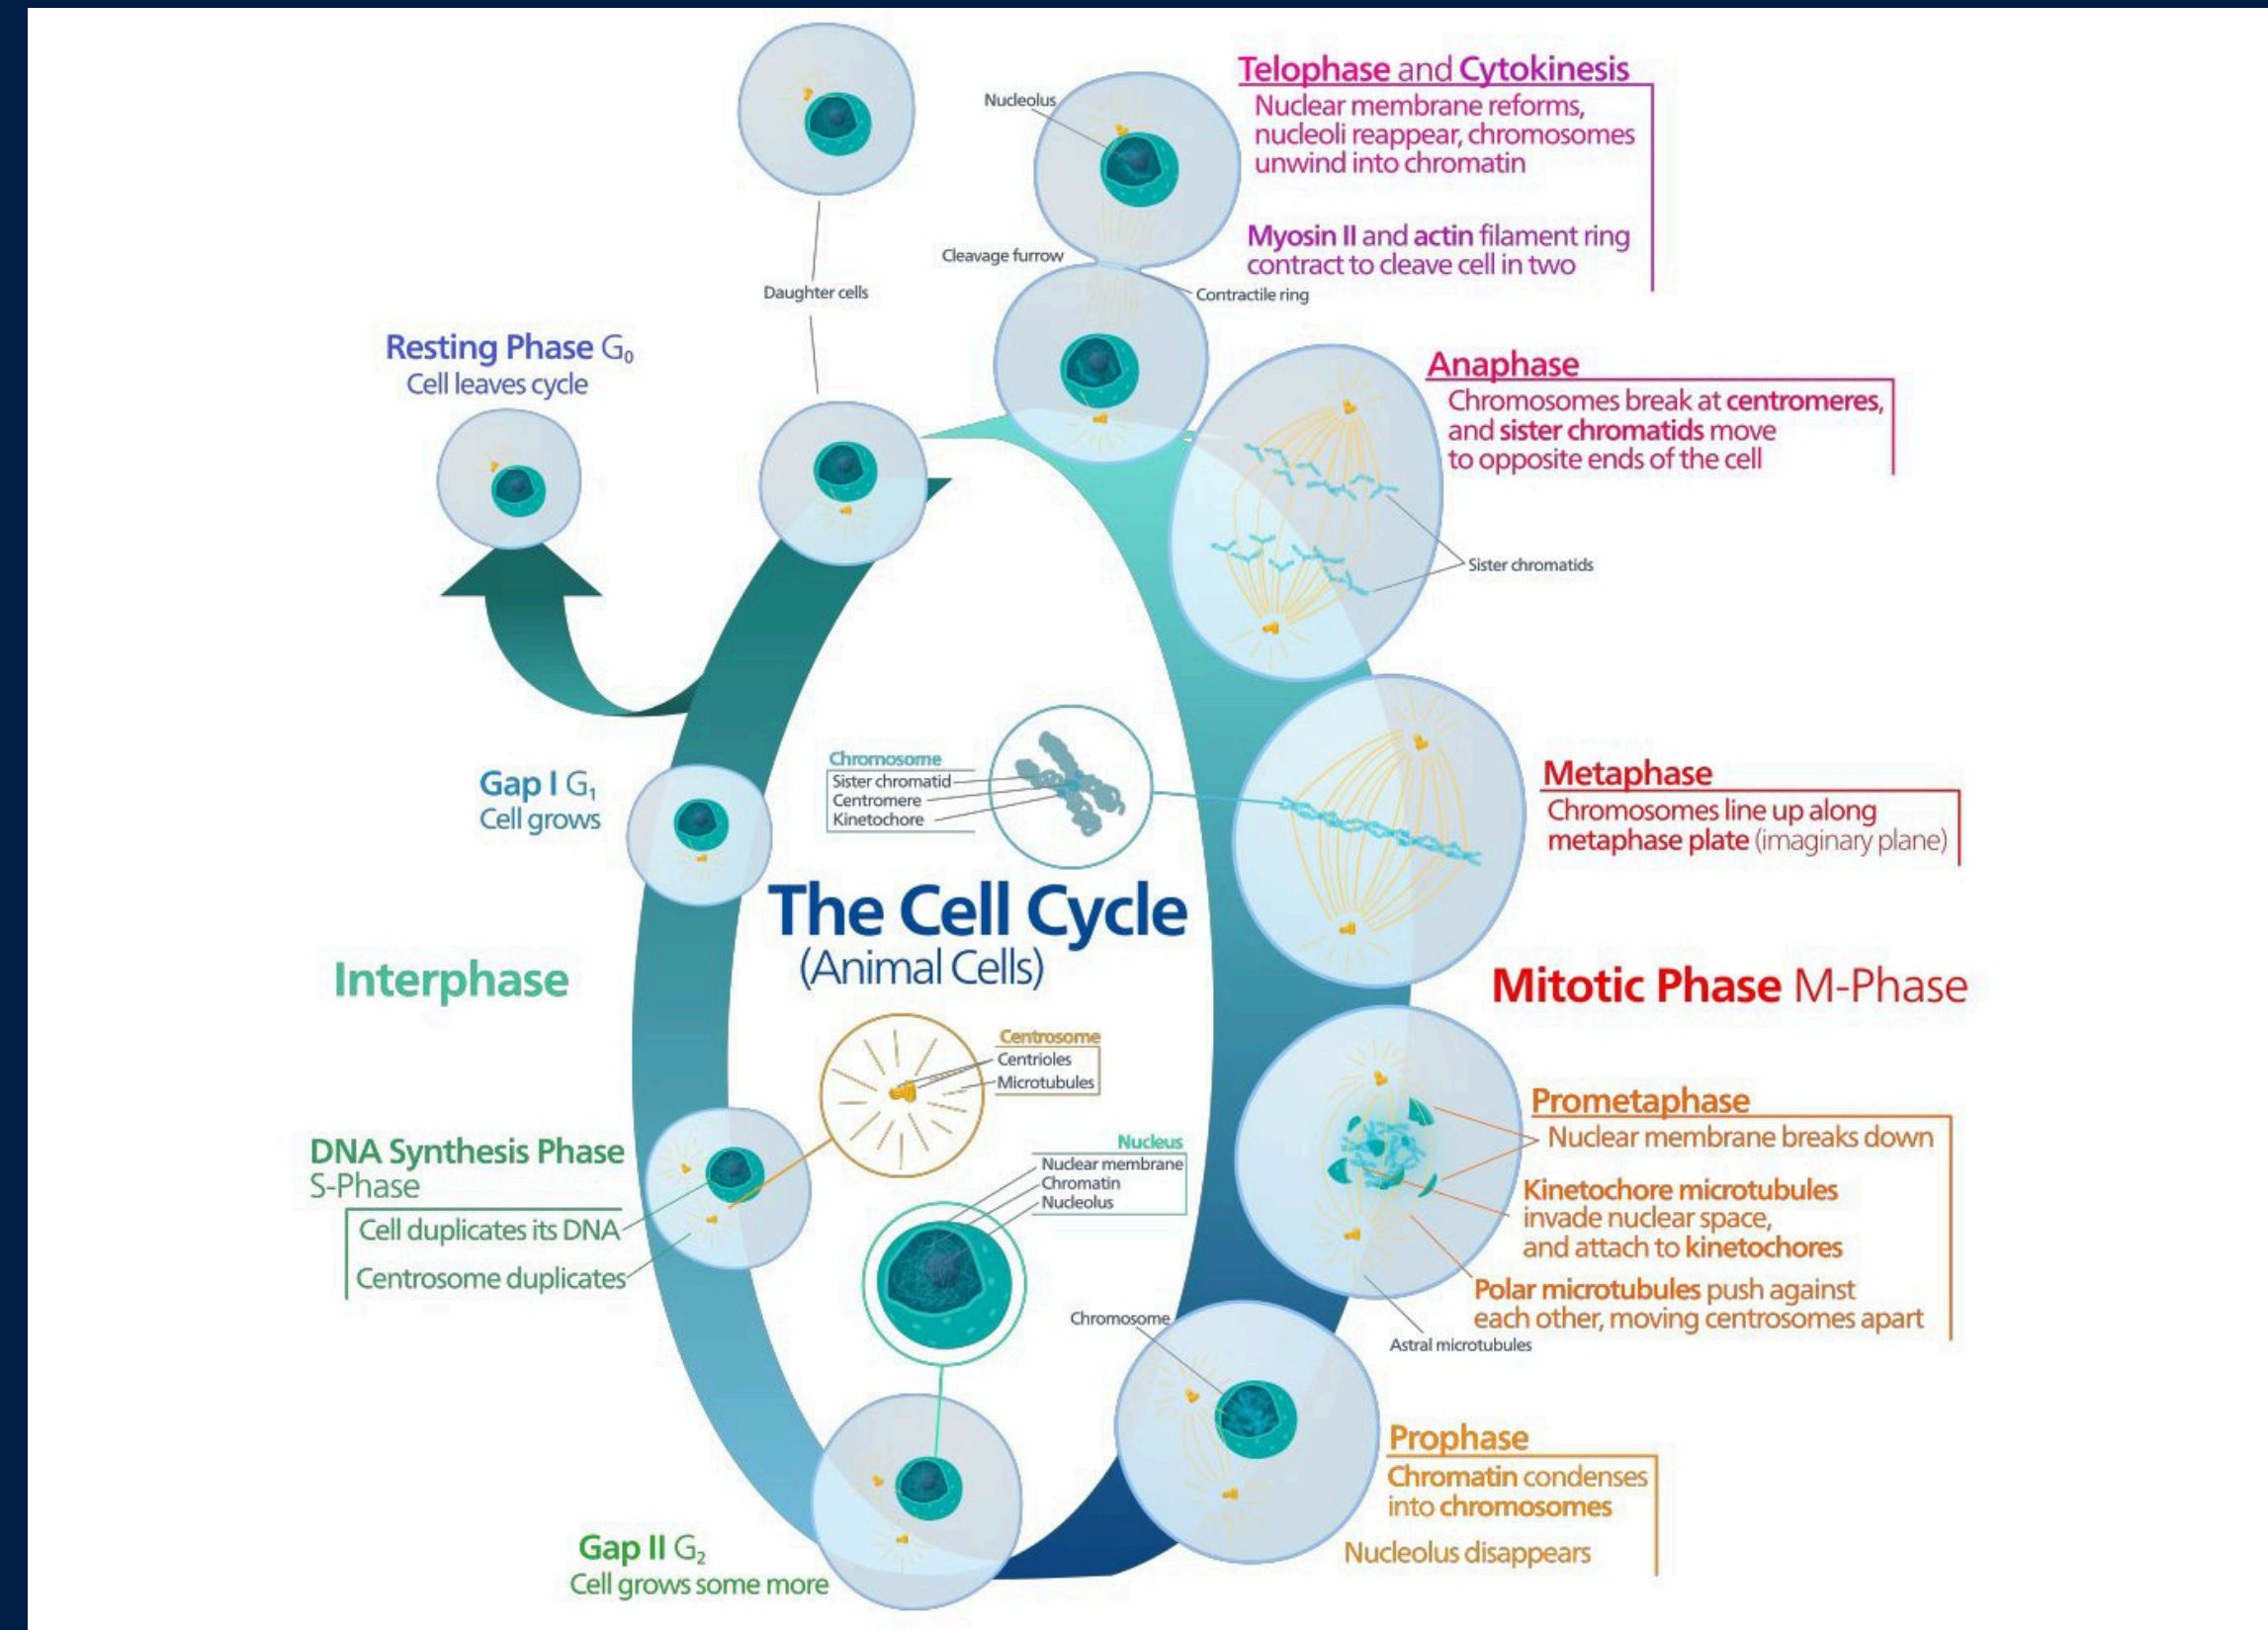

WHAT ARE CELLS?

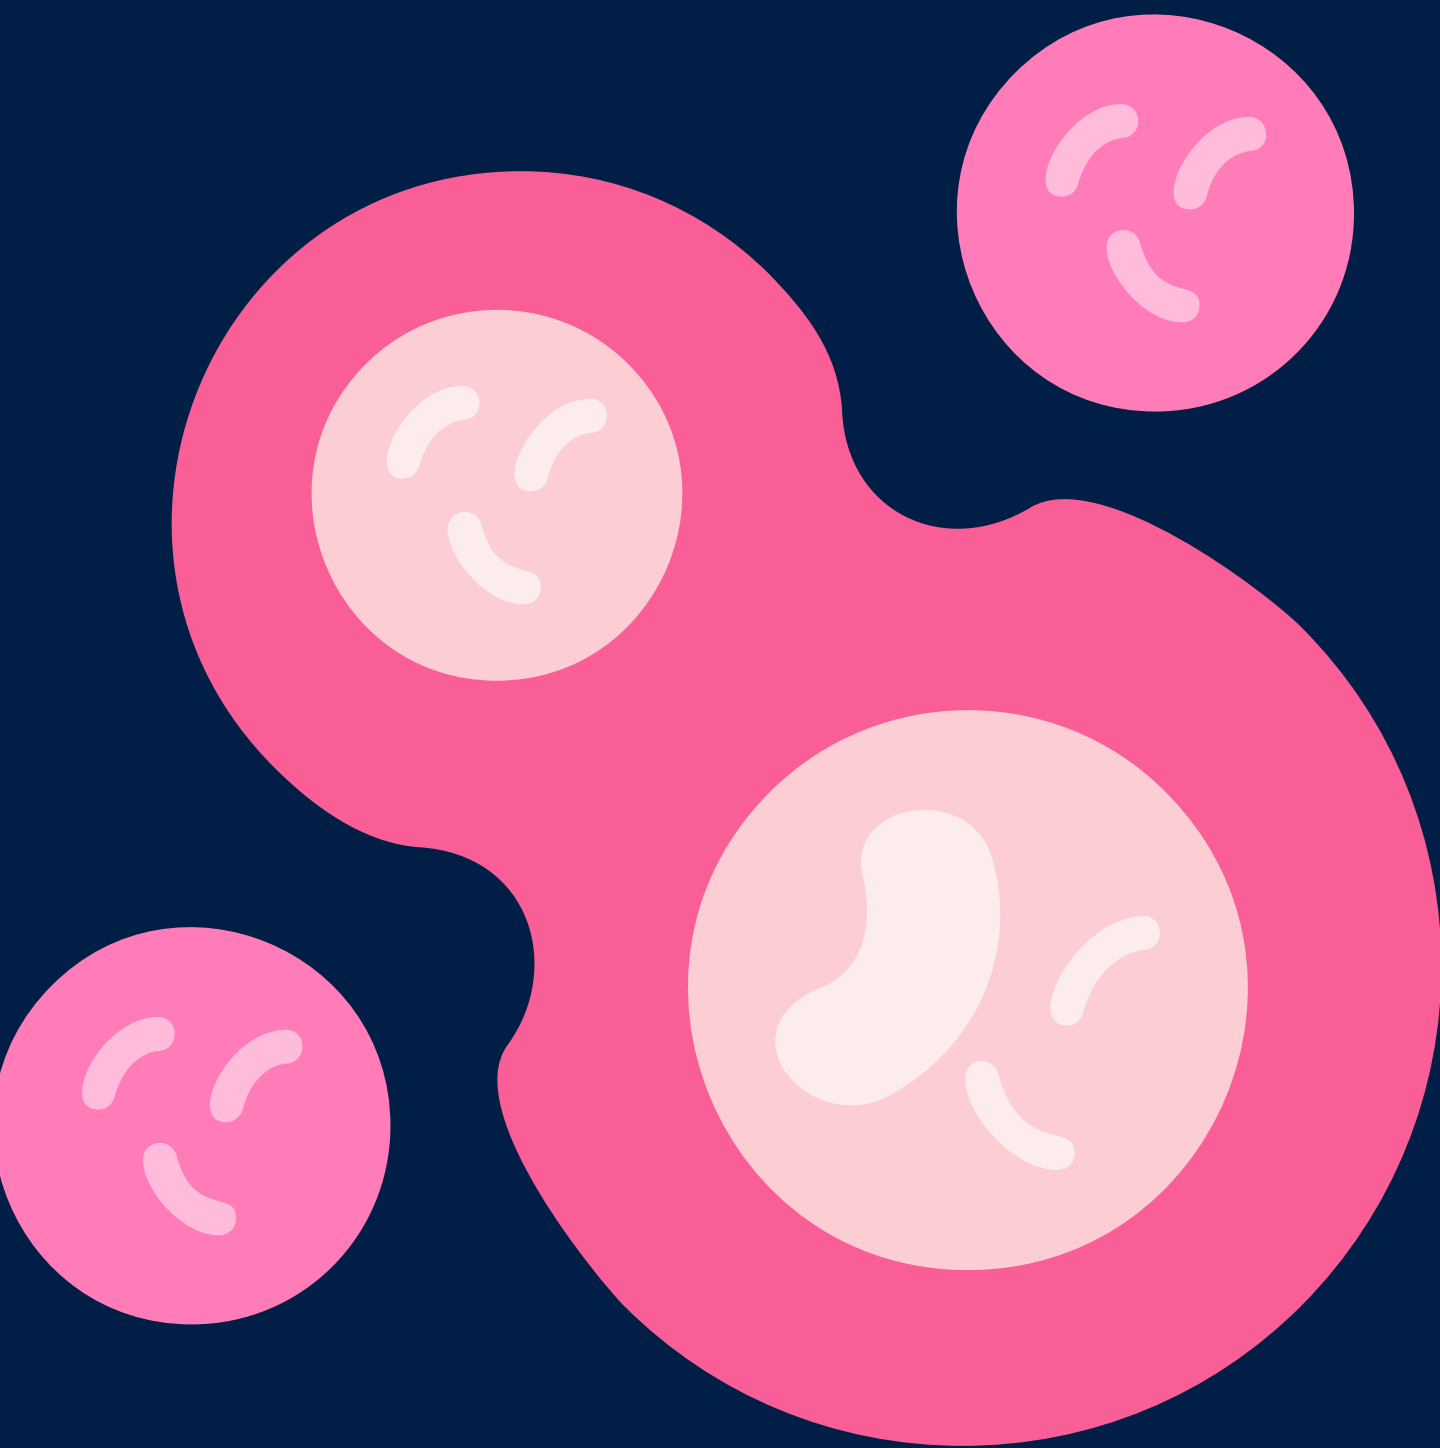

Cells are the structures that make up all living forms. In fact, your body has more than 30 trillion cells. Cells have three main parts:

- **Cell membrane:** This thin layer surrounds a cell. It has receptors that control what goes in and out of the cell.
- **Cytoplasm:** This fluid inside each cell makes proteins. It's also where most chemical reactions inside a cell take place.
- **Nucleus:** This structure inside each cell contains most of your genetic information in the form of deoxyribonucleic acid (DNA). The nucleus also makes ribonucleic acid (RNA). RNA carries DNA, which develops into proteins cells need to function.

ALL CELLS HAVE A LIFE CYCLE!

ON AVERAGE... Our bodies
makes **3.8 billion** new
cells every single second
and replaces around
330 billion cells per day!

WHAT IS CELLULAR SENESENCE?

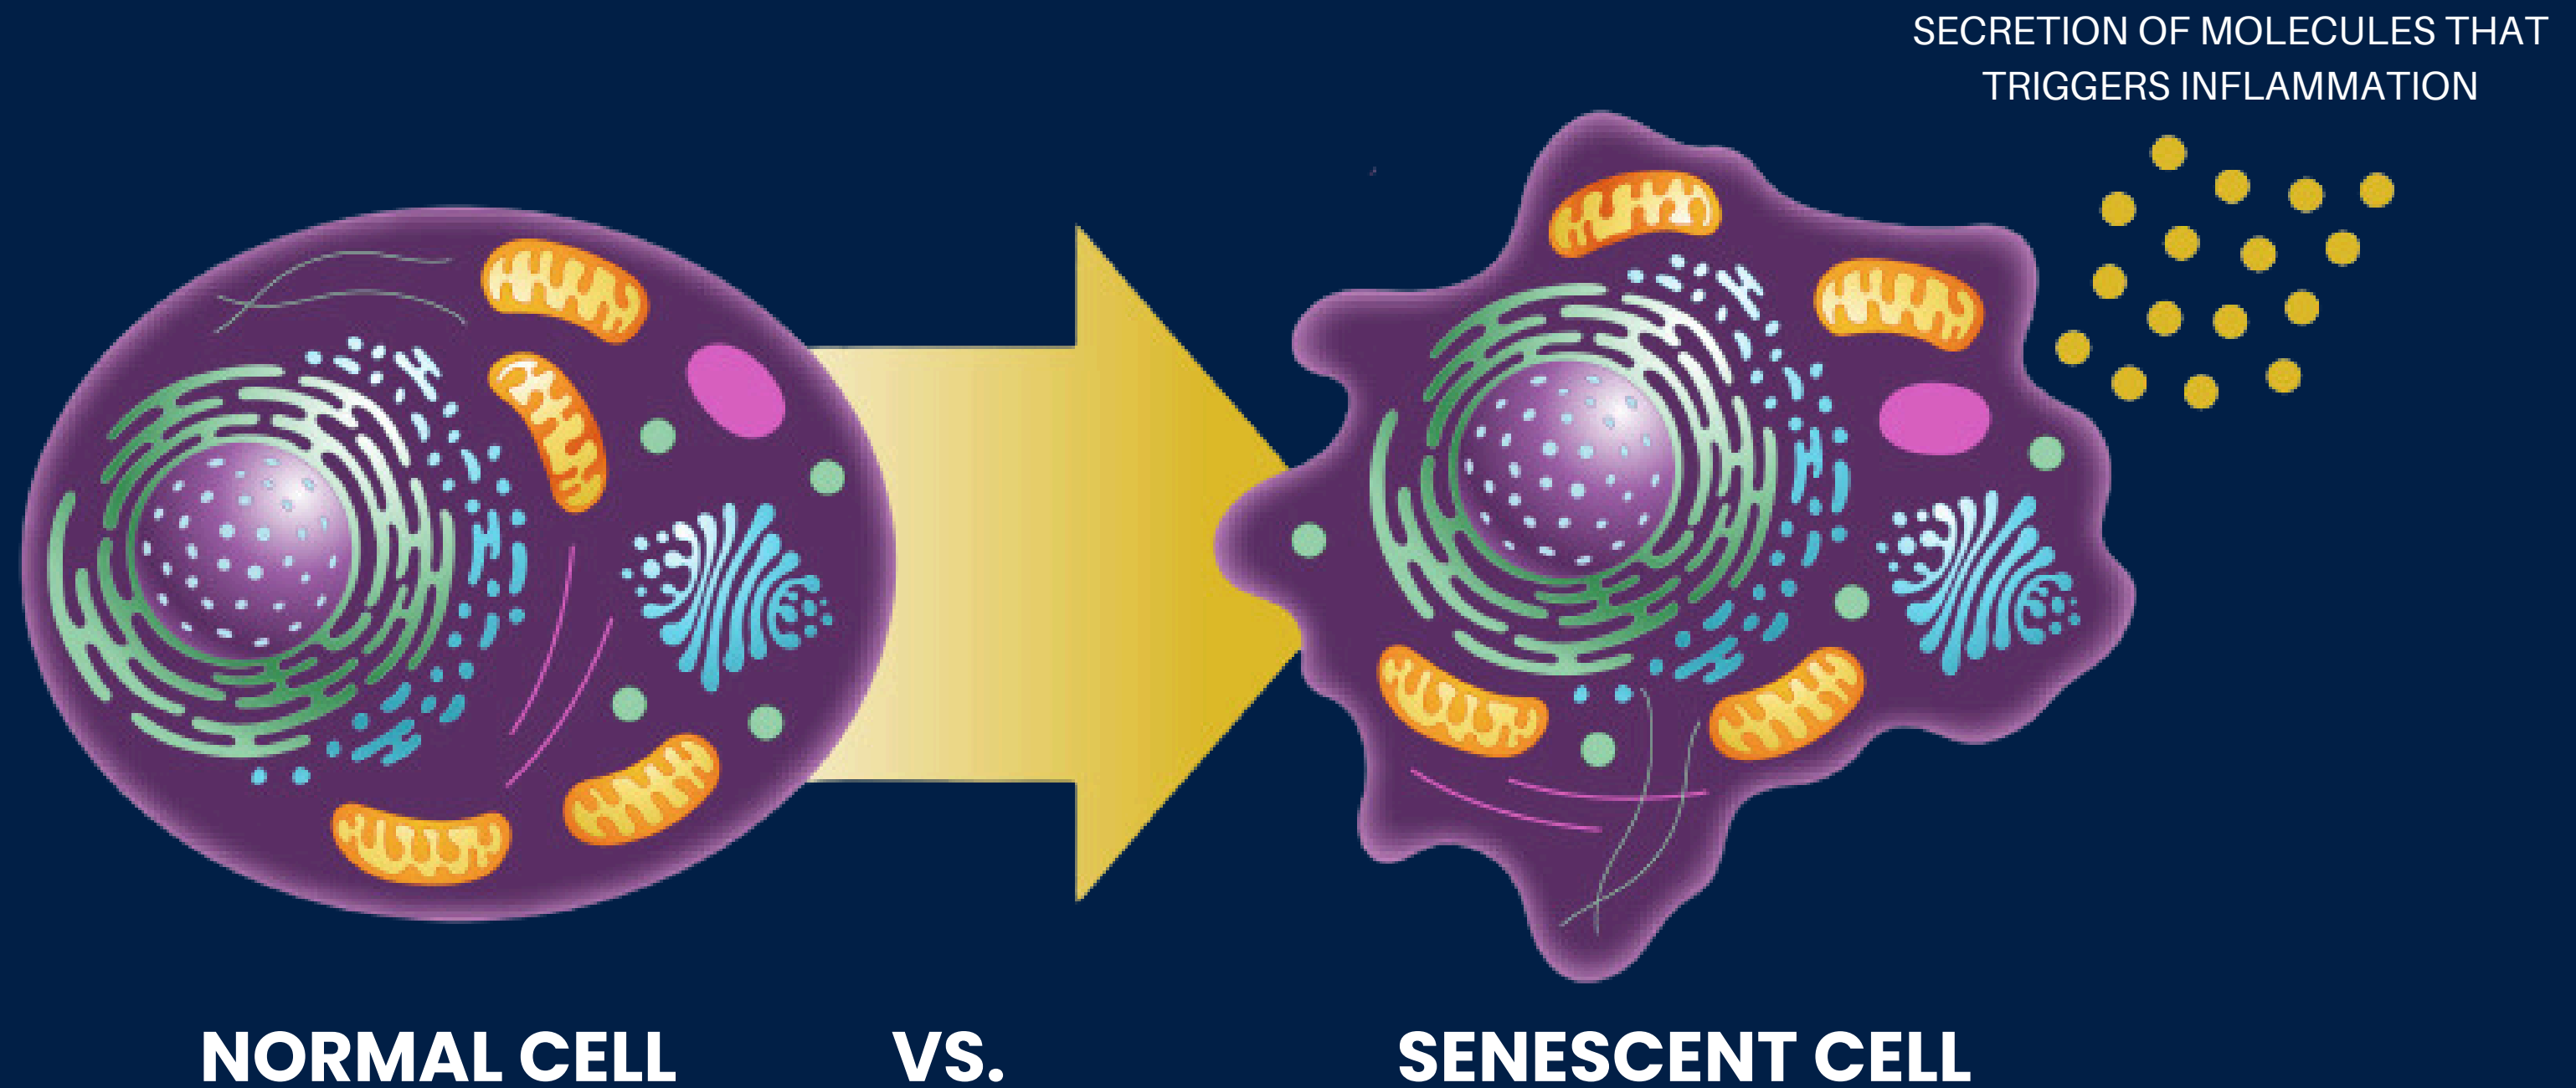

Senescent cells are unique in that they eventually stop multiplying but don't die off when they should. They instead remain and continue to release chemicals that can trigger inflammation.

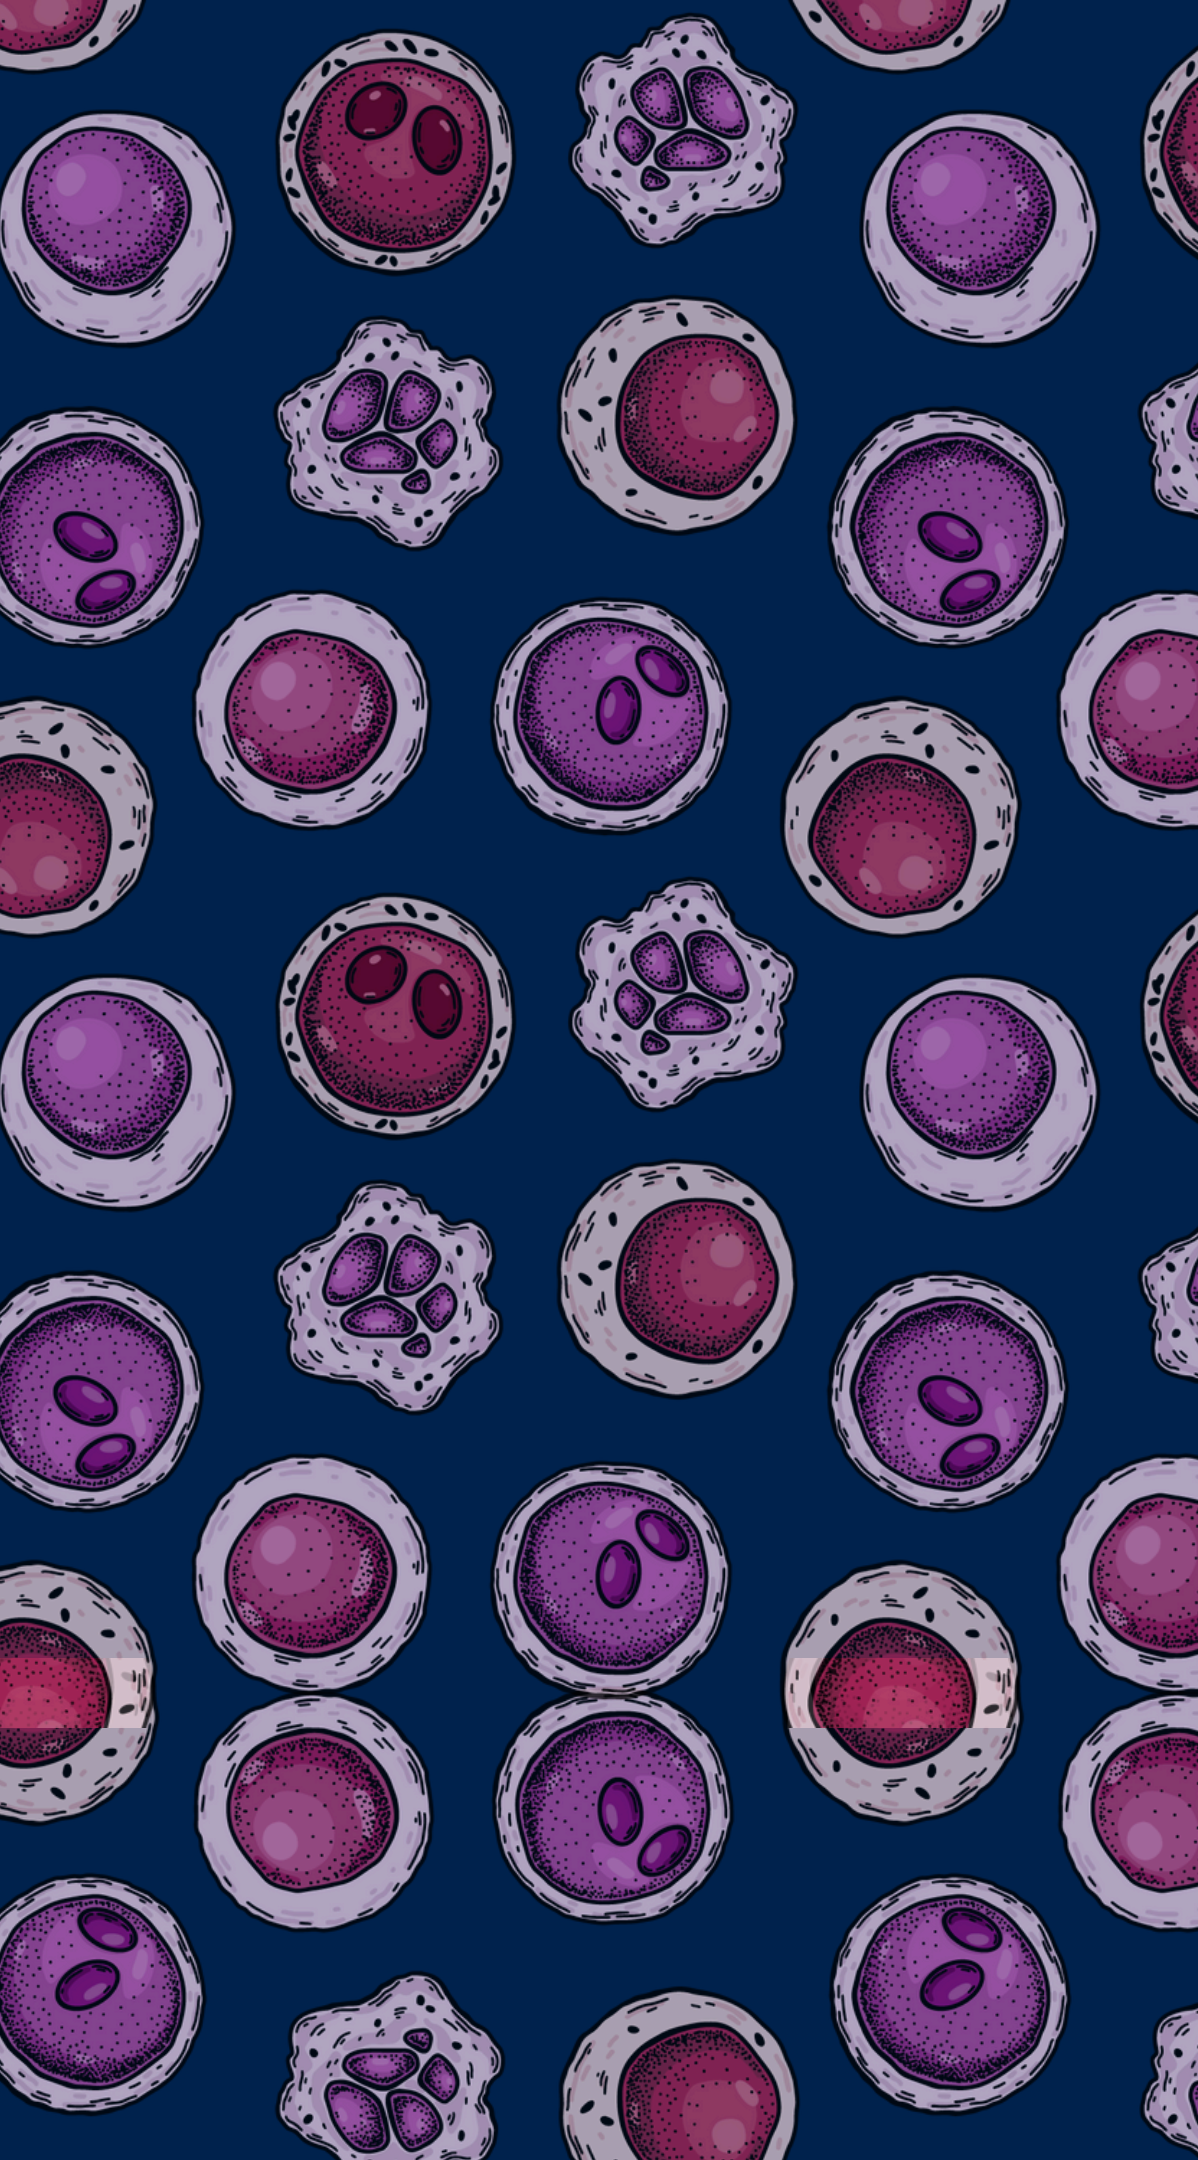

Like the one moldy piece of fruit that corrupts the entire bowl, a relatively small number of senescent cells can persist and spread inflammation that can damage neighboring cells.

The number of senescent cells in a person's body increases with age. As the aging immune system becomes less efficient, senescent cells accumulate and taint healthy cells. This can affect a person's ability to withstand stress or illness; recuperate from injuries; and learn new things, since senescent cells in the brain can degrade cognitive functions.

NORMAL CELL VS. SENESCENT CELL:

Stem cells are vital components for healing, renewing, and restoring damaged tissues in the body.

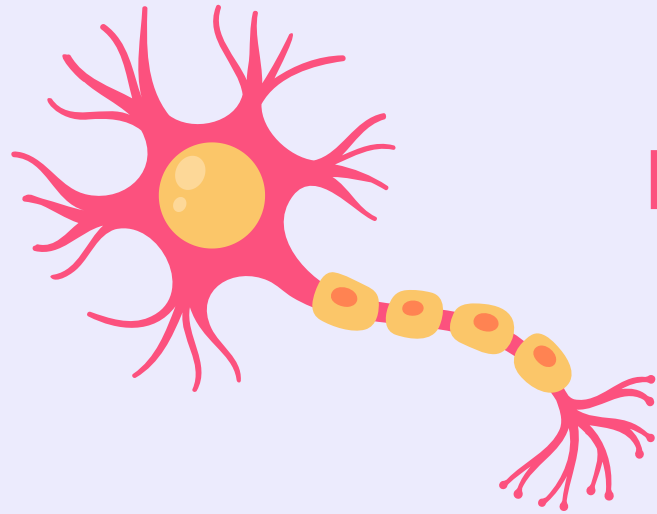

These master cells can form into specialized cells, like muscle cells, blood cells, brain cells, etc. Circulating the bloodstream, they flow to the tissues in need, reproduce, and become healthy new cells.

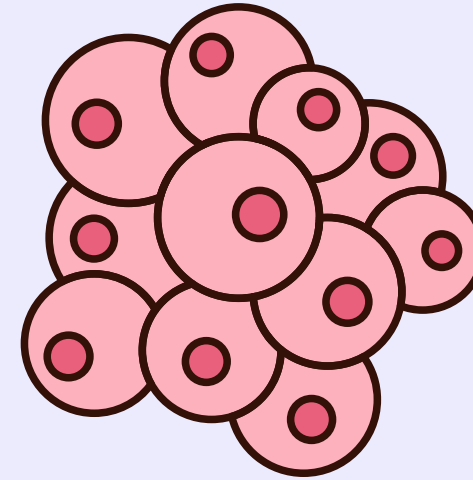

how does this work?

STEM CELLS TURN INTO:

NEURONS

RED BLOOD CELLS

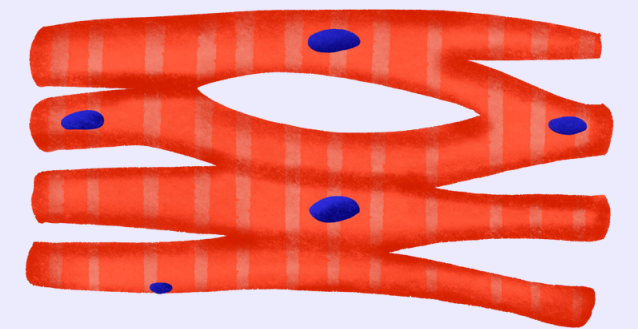

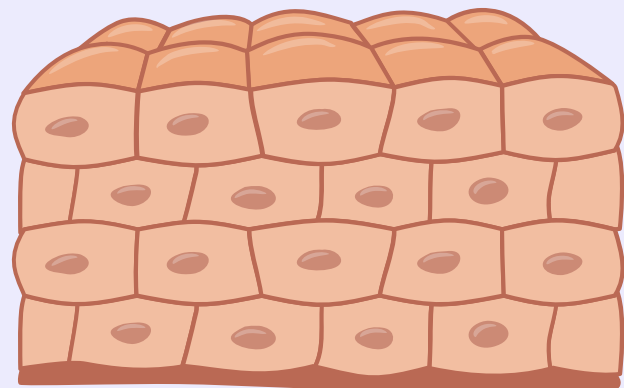

FAT CELLS

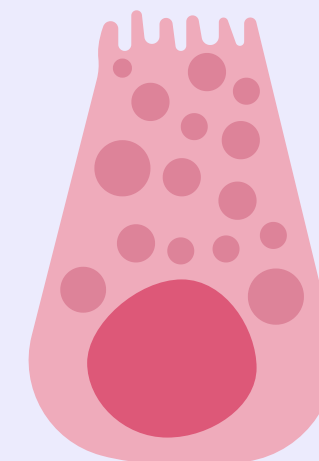

STEM CELLS

EPITHELIAL CELLS

CARDIAC MUSCLES

ENTEROCYTES

CHONDROCYTES

Stem Cell Release Factor utilizes natural botanical extracts that are clinically proven to increase the body's natural support to encourage the release of stem cells.

Supplement Facts

Serving Size: 2 Vegetable Capsules

Servings per Container: 30

	Amount Per Serving	% DV
--	--------------------	------

Proprietary Blend: See Buckthorn:

(*Hippophae rhamnoides* berry) Extract

5:1, *Aphanizomenon flos-aquae* (AFA) 912 mg †

alga Concentrate 5:1, Fucoidan 85%

(*Laminaria Japonica* alga extract),

Piperine (*Piper longum* fruit extract)

†% Daily Value Not Established.

OTHER INGREDIENTS: hypromellose (vegetable capsule), organic rice concentrate.

MANUFACTURED EXCLUSIVELY FOR:

Great Life Worldwide

Beloit, KS 67420

1.866.822.5559

Stem Cell Release Factor™
is a vital ally in the pursuit of
sustained health and vitality,
especially as the natural
aging process impacts stem
cell production. It is an ideal
choice for those seeking to
naturally enhance their
body's regenerative
processes and maintain
wellness through the years.

**MILLIONS OF
NEW CELLS.**

TAKE ADVANTAGE
OF THIS POWERFUL
PRODUCT TO TAKE
YOUR HEALTH TO
THE NEXT LEVEL.

TRY IT TODAY!
